

**REMUDALA SANJAY KUMAR**  
**NetSuite Functional Consultant**

**Mobile:** +91 – 86396 20148  
**E-mail:** sanjaynetsuite@gmail.com

---

**Career Objective**

Experienced NetSuite Functional Consultant with 5 years of hands-on expertise in full-cycle implementations, system customizations, and integrations. Adept in core business processes including Procure-to-Pay (P2P), Order-to-Cash (O2C), Supply Chain Management (SCM), Design-to-Build (D2B), and Fixed Asset Management (FAM). Strong background in financial operations and data migration. Proficient in NetSuite, Salesforce, and Dell Boomi, with a proven ability to optimize workflows and align technology solutions with organizational objectives.

**Profile Summary**

Results-driven NetSuite professional with 5 years of experience in implementations, customizations, integrations, and post-go-live support across key business processes.

- Strong expertise in end-to-end testing, planning, execution, and performance optimization.
- Proficient in supporting day-to-day post-production activities, gathering and analyzing new business requirements, conducting application testing, preparing documentation, and delivering user training.
- Experienced in collaborating with business users to understand functional needs and recommend optimal NetSuite solutions.
- Skilled in customizing and maintaining NetSuite dashboards, reports, and saved searches.
- Hands-on experience in data migration using CSV imports, including developing field mapping templates from legacy systems to NetSuite.
- Proficient in creating custom fields across various record types, including Entity, Item, Transaction Body, and Transaction Column fields.
- Actively involved in User Acceptance Testing (UAT) and addressing defects during the testing phase.
- Exposure to integrations with third-party applications.
- Capable of managing NetSuite release updates and ensuring system compatibility.
- Well-versed in NetSuite configurations and customizations tailored to specific business requirements.
- Strong functional knowledge of Order-to-Cash (O2C) and Procure-to-Pay (P2P) processes.
- Responsible for developing Technical Requirement Documents (TRDs) and End-User Training materials.
- Proficient in creating and managing custom records, saved searches, reports, fields, forms, SuiteBundler packages, and dashboards within NetSuite.

**Work Experience**

- Currently employed as a NetSuite Functional Consultant at Wipro since June 2020.

**Education**

- Bachelor of Technology (B.Tech) from Guru Nanak Institute of Technology.

**Expertise Includes:**

Procure-to-Pay (P2P) and Order-to-Cash (O2C) processes, post-production support, saved searches and reporting, form and record customizations, data migration, role/access management, and dashboard configuration.

## **Projects Portfolio**

### **Project-1: Splunk**

#### **Description:**

Splunk Inc., headquartered in San Francisco, is a U.S. software company specializing in tools for searching, monitoring, and analyzing machine-generated data through a web-based interface.

- Requirement gathering through direct interaction with customers and end users
- Drafting and maintaining detailed requirement and functional specification documents
- Configuring and customizing NetSuite solutions to align with business needs
- Coordinating with development teams for successful delivery of technical solutions
- Validating customized features through thorough UAT
- Conducting user training sessions and developing user manuals
- Executing smooth data migration from legacy systems to NetSuite
- Managing post-implementation support and system enhancements

### **Project-2: Grafana**

#### **Description:**

Grafana is an open-source, cross-platform web application for analytics and interactive data visualization, enabling charts, graphs, and alerts from connected data sources.

- Collaborated with users to capture and define functional requirements
- Created comprehensive requirement documents for customization efforts
- Executed product customizations based on client specifications
- Acted as a liaison between business stakeholders and technical teams
- Led UAT activities to ensure quality and functional alignment
- Conducted user training and authored detailed user guides
- Migrated data from legacy systems into NetSuite
- Delivered post-implementation support and ongoing system improvements

### **Project-3: Sentry**

#### **Description:**

Sentry specializes in APM and error monitoring but doesn't provide the broader feature set of New Relic. However, if your primary need is Application Performance Monitoring, Sentry can be a strong alternative to consider.

- Gathered and analyzed business requirements through direct interaction with customers and end users
- Prepared Business Requirement Documents (BRD) and Functional Specifications
- Customized NetSuite functionalities including fields, forms, workflows, and saved searches
- Communicated functional requirements to the development team for implementation
- Led User Acceptance Testing (UAT) and ensured resolution of identified issues
- Delivered end-user training and created user manuals and training materials
- Managed data migration from legacy systems, including mapping, validation, and testing
- Provided post go-live support and implemented enhancements based on business needs
- Collaborated with cross-functional teams to ensure successful project delivery and user adoption
