Career Objective:
Results-driven NetSuite Functional Consultant with 5+ years of experience in implementation, customization, and post-go-live support. Seeking to contribute proven expertise in streamlining business processes and delivering scalable NetSuite solutions that drive operational efficiency.

Profile Summary:
A highly committed and results-driven professional with approximately 5+ years of experience as a NetSuite Functional Consultant.

- Strong expertise in end-to-end testing, including planning, execution, and optimization support.
- Skilled in providing post-production support, gathering new requirements, and conducting thorough application testing to ensure business needs are met—along with documentation and user training on newly implemented processes.
- Adept at collaborating with users to understand business requirements and deliver optimal NetSuite solutions.
- Proficient in customizing and maintaining NetSuite dashboards, reports, and saved searches.
- Hands-on experience in data migration using CSV imports and creating field mapping templates to align legacy data with NetSuite structures.
- Extensive knowledge in creating Custom Entity Fields, Item Fields, Transaction Body Fields, and Transaction Column Fields within NetSuite.
- Actively participated in User Acceptance Testing (UAT) sessions and resolved issues identified during testing.
- Well-versed in integrating NetSuite with third-party applications.
- Experienced in managing NetSuite updates and handling release processes efficiently.
- Demonstrated ability to configure and customize NetSuite to align with business objectives.
- Solid understanding of the Order-to-Cash (O2C) and Procure-to-Pay (P2P) processes.
- Responsible for creating Technical Requirement Documents and End-User Training Materials.
- Expertise in customizations, including Custom Records, Saved Searches, Reports, Fields, Forms, Suite Bundler, and Dashboards.

Professional Experience:
Custologix Solutions | NetSuite Functional Consultant | March 2020 – Present

Education:
RK Degree College | Bachelor of Business Administration (BBA)

Skills & Tools:

NetSuite ERP: Implementation, Customization, Data Migration

Customization: Custom Fields, Records, Reports, Dashboards, Suite Bundler

Testing: End-to-End Testing, UAT, Bug Fixing

Business Support: Requirement Gathering, Post-Production Issue Resolution, User Training

Project Eperience:

Project 1: Vercel
Vercel Inc. is a cloud platform company that maintains the Next.js framework.
Roles & Responsibilities
- Supported NetSuite users with Saved Searches, Reports, KPIs, and Dashboards.
- Developed validation workflows and automated email alerts.
- Created and customized reports, KPIs, Dashboards, and configurations.
- Implemented Suite Flow workflows and Suite Scripts.
- Mapped legacy data to NetSuite fields.
- Assisted with month-end reporting and data templates.
- Provided user training on CSV imports and legacy asset migration.
- Monitored NetSuite alerts and tested new releases.

Project 2: WorkFusion
WorkFusion is an intelligent automation platform for enterprises.
Roles & Responsibilities
- Implemented variable pricing and employee scheduling for invoicing.
- Managed data migration from legacy systems to NetSuite.
- Developed custom workflows, reports, Dashboards, and Saved Searches.
- Configured role permissions and global permissions.
- Created custom fields, records, and workflows.
- Configured approval processes and deployed Suite Bundles.
- Mapped legacy data to NetSuite fields.

Project 3: Replit
Replit is an online integrated development environment for programming.
Roles & Responsibilities
- Gathered requirements from customers/users and prepared documentation.
- Customized products based on requirements and communicated to development.
- Performed UAT, provided end-user training, and created user manuals.
- Led data migration and post-live support.

Project 4: Ford Direct
Roles & Responsibilities
- Developed, tested, and deployed customizations and new functionality.
- Created custom fields, records, roles, and workflows in NetSuite.
- Designed and managed reports and Dashboards for team functions.
- Configured technology tools and integrations, conducted system testing.
- Deployed client-specific bundles and revised configurations as needed.
- Managed role and global permissions.
