Enagandula Sathish Kumar
NetSuite Functional Consultant

Email: sathishkumar.enagandula@gmail.com
Phone: +91 – 7416556135

Career Objective

Experienced and results-driven **NetSuite Functional Consultant** with close to **5 years of dedicated ERP experience**, specializing in end-to-end NetSuite implementations, customizations, data migration, and post-go-live support. Seeking a dynamic role in a growth-focused organization where I can apply my expertise to streamline business processes, enhance operational efficiency, and deliver scalable, technology-driven solutions aligned with strategic goals. Committed to continuous learning and contributing to organizational success through collaboration, innovation, and client-focused delivery.

CareerSummary

Implementation & Optimization: Proven track record in full-cycle projects—from scoping and testing to performance tuning and release management.

Solution Design: Partner seamlessly with stakeholders to capture requirements, perform gap analyses, and craft best-fit functional designs.

Customization & Reporting: Expert in SuiteFlow, custom fields (Entity, Item, Transaction Body/Column), dashboards, saved searches, and SuiteBundler packages.

Data Migration: Extensive CSV import experience, including legacy-to-NetSuite field mapping, cleansing, validation, and reconciliation.

Integration & Automation: Hands-on exposure to third-party integrations and workflow automation, ensuring seamless data flow across systems.

User Enablement: Author Technical Requirement Documents and user guides; deliver training that accelerates adoption and maximizes ROI.

Post-Production Support: Resolve day-to-day functional issues, manage release updates, and drive continuous improvement initiatives.

Experience

- **NetSuite Functional Consultant**
  BMS Infosolutions Pvt. Ltd. — September 2023 to Present
- **NetSuite Functional Consultant**
  HCL Technologies — June 2022 to August 2023
- **NetSuite Functional Consultant**
  Symplocos Solutions Ltd. — September 2019 to May 2022

Education

- **Bachelor of Technology (B.Tech), Computer Science and Engineering**
  Malla Reddy Institute of Technology — 2014

Expertise Includes

- Deep functional knowledge of **Procure-to-Pay (P2P)** and **Order-to-Cash (O2C)** cycles, with hands-on experience in streamlining procurement, order management, invoicing, and collections within NetSuite.
- Proficient in creating and managing **saved searches, custom reports, and interactive dashboards**, enabling real-time business insights and decision-making support.
- Skilled in **form and record customizations**, secure **role/access management**, and **data migration** from legacy systems using field mapping and CSV import tools.

Projects Portfolio

Project-1: Datadog

Description:

Datadog, Inc. is a U.S.-based company offering a SaaS-based observability platform for monitoring cloud-scale applications, including servers, databases, and services.

- Requirement gathering through direct interaction with customers and end users
- Drafting and maintaining detailed requirement and functional specification documents
- Configuring and customizing NetSuite solutions to align with business needs
- Coordinating with development teams for successful delivery of technical solutions
- Validating customized features through thorough UAT
- Conducting user training sessions and developing user manuals
- Executing smooth data migration from legacy systems to NetSuite
- Managing post-implementation support and system enhancements

Proejct-2: SolarWinds

Description:

SolarWinds Corporation is a U.S.-based company that provides software solutions for managing business networks, systems, and IT infrastructure.

- Collaborated with users to capture and define functional requirements
- Created comprehensive requirement documents for customization efforts
- Executed product customizations based on client specifications
- Acted as a liaison between business stakeholders and technical teams
- Led UAT activities to ensure quality and functional alignment
- Conducted user training and authored detailed user guides
- Migrated data from legacy systems into NetSuite
- Delivered post-implementation support and ongoing system improvements

Proejct-3: Dynatrace

Description:

Dynatrace, Inc. is a U.S.-based multinational technology company offering an observability platform used to monitor, analyze, and optimize application performance, cybersecurity, software development, IT infrastructure, and user experience.

- Gathered and analyzed business requirements through direct interaction with customers and end users
- Prepared Business Requirement Documents (BRD) and Functional Specifications
- Customized NetSuite functionalities including fields, forms, workflows, and saved searches
- Communicated functional requirements to the development team for implementation
- Led User Acceptance Testing (UAT) and ensured resolution of identified issues
- Delivered end-user training and created user manuals and training materials
- Managed data migration from legacy systems, including mapping, validation, and testing
- Provided post go-live support and implemented enhancements based on business needs
- Collaborated with cross-functional teams to ensure successful project delivery and user adoption
